Finance

Undergraduate Concentration

......

Finance, at its core, is concerned with the allocation of resources such as cash flow, assets, investments, and securities. Finance combines the science of mathematics and statistics with the art of behavior and emotions.

Finance is a functional area of business and economics that deals with raising, allocating, and managing funds by firms, households and individuals. Important sub-areas of finance include corporate finance and investments. With this concentration, you will learn how an organization finds money to operate, grows the organization, makes acquisitions, plans for the financial future, and manages any cash on hand.

Concentration Requirements

Career Outcomes

What Can I Do With this Concentration?

Careers in finance require quantitative skills as well as a great deal of flexibility, innovation, and creativity. Broadly, finance can be divided into "corporate finance" and "investments." Corporate finance examines the world from the firm's perspective, while investments explores the world from the investor's perspective. Opportunities are available in large multinational companies or smaller organizations with high growth prospects.
