Georgia Tech Alum Willie Tillery co-founded Accelarad in 1999. At the time, he recognized an opportunity for cloud technology in radiology. Due to his vision and leadership, today Accelarad's network covers more than 1,700 facilities and hosts the exchange of over 400 million medical images annually.

Willie earned his Masters of Science in electrical engineering at the Georgia Institute of Technology, specialized in digital signal processing and telecommunications. Prior to that, he received his B.S. summa cum laude in electrical engineering from North Carolina A&T State University.

Tillery will speak at Georgia Tech's IMPACT Speaker Series on Wednesday, March 11th, 2015. All are welcome to attend.

This talk is part of the IMPACT lecture series sponsored by the Institute for Leadership and Entrepreneurship.
