Daryl Dulaney  
CEO, Siemens Industry

As president and CEO, Daryl Dulaney is responsible for executive management of Siemens Industry, Inc., a multi-billion dollar entity with 22,000 employees, comprising the newly-created Siemens Infrastructure & Cities Sector and the Siemens Industry Sector in the United States. Effective October 1, 2011, he also serves as CEO of the Infrastructure & Cities (IC) Sector in North America, which is focused on providing answers for aging urban infrastructure. The IC sector is comprised of five divisions: Building Technologies, Low and Medium Voltage, Mobility and Logistics, Rail Systems and Smart Grid. Previously, Dulaney was the U.S. CEO of Siemens Building Technologies, Inc., a premier provider of energy and environmental solutions, building controls and fire safety and security systems. After his appointment to CEO in 2005, Dulaney guided Building Technologies through a transformation that resulted in unprecedented revenue growth and record profitability.

Dulaney joined Building Technologies as a sales engineer in 1979. He has held several key managerial positions throughout his career, ranging from joint venture management in Hong Kong to senior vice president of field operations, North America. Additionally, Dulaney led the Building Automation business unit of Building Technologies to four consecutive years of double-digit increases in sales, profit and EVA.

Dulaney is a board member of the Siemens Foundation, which provides more than $4.5 million annually in grants and other financial support towards science, technology, engineering and math education initiatives. Daryl is also a member of the board of the National Electrical Manufacturers Association (NEMA).

Dulaney earned a Bachelor of Science in Architecture from Ohio State University and a Master in Business Administration from the J. L. Kellogg School of Management at Northwestern University. He has two adult children and currently resides in Naples, Fla., with his wife, Jan.
