Posting Jobs for Georgia Tech Undergrad Business Students

Thank you for your interest in recruiting our Georgia Tech undergraduate business students. Depending on your staffing needs, we have several avenues for posting your career opportunities:

**Internships and Full-time Permanent Jobs**
- Register (for free) as an employer through the Georgia Tech job posting site, Career Buzz: [https://gatech-csm.symplicity.com/employers/](https://gatech-csm.symplicity.com/employers/).
- This site will allow you to:
  - Post jobs (internships and full-time positions),
  - Sign up to present an information session,
  - Manage the interview process.

**Co-op Program (alternating semesters of full-time employment and classes)**
- Register to become a co-op company, where students work while alternating with full-time school semesters.
- This program allows students to build experience with your organization on a predetermined schedule. Students work full-time at your company every other semester until they have worked three terms.
- More information can be found at: [http://www.coop.gatech.edu](http://www.coop.gatech.edu).

**Jobs Specific to Business Students**
- E-mail job postings to Careers@Scheller.gatech.edu, and we will e-mail them directly to our business students.
- Business students can apply to your positions:
  - Through Career Buzz,
  - Through your Website, or,
  - By e-mailing their resumes to you.

Whether or not you post using the first two options above, **we recommend that you use the third option — Jobs Specific to Business Students** — for all business positions so that we can communicate your opportunities directly to all of our business students. Inclusion of your job postings in our weekly e-mail to our students generates more applications for the opportunity and raises awareness of your company. Based on your recruiting needs, we can combine the above methods so that you can build a program that works best for you. Thank you for including our students in your recruiting strategy.
